University information system of Mendel University in Brno allows the academic community, university staff and public to access a wide range of information. Many people have devoted much of their time and effort to help implement the system at the university. Therefore, we will truly appreciate if you direct any problems you encounter or comments you may have to the university system administrators. This way we will be able to help you or complement the information system with any relevant features. We recommend that you contact us on our e-mail address

CERTIFICATE FOR "EDUROAM" WIRELESS NETWORK

Use this application to generate and receive a user certificate for WiFi network eduroam valid for 6 months, i.e. each semester you have to generate a new certificate. The very access to eduroam network is conditioned by the access permission to "faro" server existent in the register of your accounts in the computer network central management at our university.

You can generate a new certificate for user valid for 6 months from the moment of generating.

[Generate certificate](#)

certificate of 31. 01. 2021 exists at the moment which you can download using this application.

To install user certificate use the password `muT.6.syn.ydc`

- **Download basic user certificate PKCS#12 (or PFX)(application: MS Windows->WiFi)**
Load user certificate DER PKCS#12 (application: Linux->WiFi)
Load user certificate PEM PKCS#12 (application: Linux->WiFi)
Load user certificate PEM PKCS#7 (application: iPaq->WiFi)
Load root certificate PKCS#12 of certificate authority (application: MS Windows->certificate verification)
Load root certificate PKCS#12 of certificate authority (application: MS Windows->certificate verification)
Load installation pack for Windows Mobile 2003

the wireless network to the MS Windows environment. You need to install the root certificate DER PKCS#12 of certificate authority and the basic user certificate PKCS#12 (PFX). To install the certificates, you need to know the above-given password. Technically, you can install the root certificate only once; to revalidate the user certificate, you need to install the basic user certificate PKCS#12 (PFX).

Instructions for installation and information at [https://www.eduroam.org/faq](#)

- [Back to Personal administration](#)

UIS MENDELU

If you don't have any valid certificates, generate a new one.

Then copy the new password.

CERTIFICATE FOR "EDUROAM" WIRELESS NETWORK

Use this application to generate and receive a user certificate for WiFi network eduroam valid for 6 months, i.e. each semester you have to generate a new certificate. The very access to eduroam network is conditioned by the access permission to "faro" server existent in the register of your accounts in the computer network central management at our university.

You can generate a new certificate for user valid for 6 months from the moment of generating.

[Generate certificate](#)

A certificate of 31. 01. 2021 exists at the moment which you can download using this application.

To install user certificate use the password **muT.6.syn.ydd**

- [Download basic user certificate PKCS#12 \(or PFX\)\(application: MS Windows->WiFi\)](#)
- Download user certificate DER PKCS#12 (application: Linux->WiFi)
- Download user certificate PEM PKCS#12 (application: Linux->WiFi)
- Download user certificate PEM PKCS#7 (application: iPad->WiFi)
- Download root certificate PKCS#12 of certificate authority (application: MS Windows->certificate verification)
- Download root certificate PKCS#12 of certificate authority (application: Linux->certificate verification)
- Download installation pack for Windows Mobile 2003

To install the wireless network to the MS Windows environment you will first need to install the root certificate DER PKCS#12 of certificate authority and then the basic user certificate PKCS#12 (PFX). To install the user certificate you need to know the above-given password. Technically advanced users may wish to try with other platforms and share their experience on UIS discussion forum. All the root certificate only once; to revalidate the user certificate, just generate a new one.
