CERTIFICATE FOR 'EDUROAM' WIRELESS NETWORK

Use this application to generate and receive a user certificate. The very access to eduroam network is granted by the access permission to register of your accounts in the computer network central management of the university.

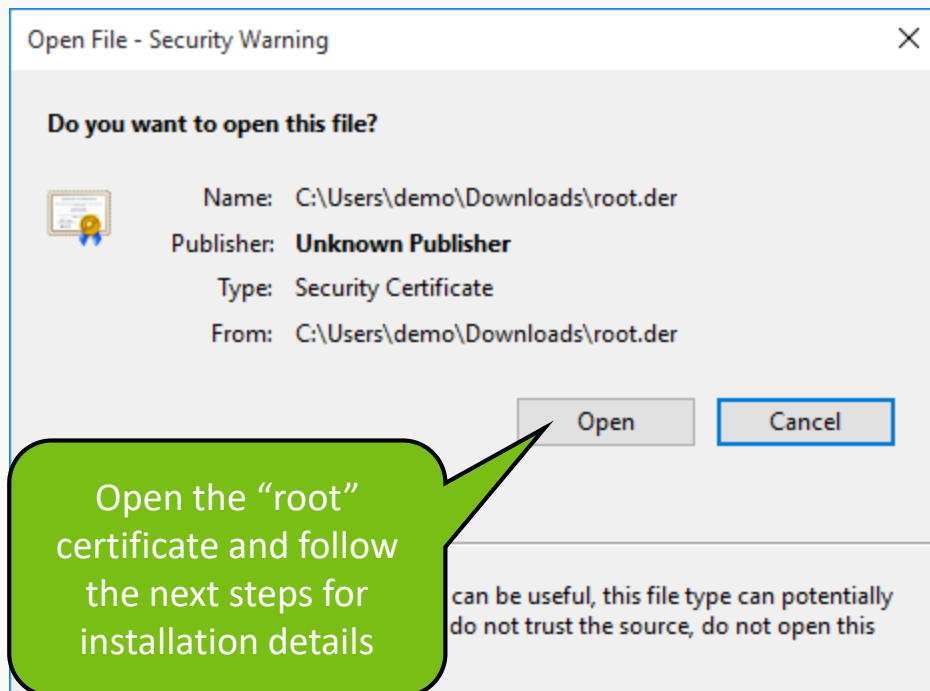

You can generate a new certificate for user **qqvavra2** valid for 6 months from the moment of generating.

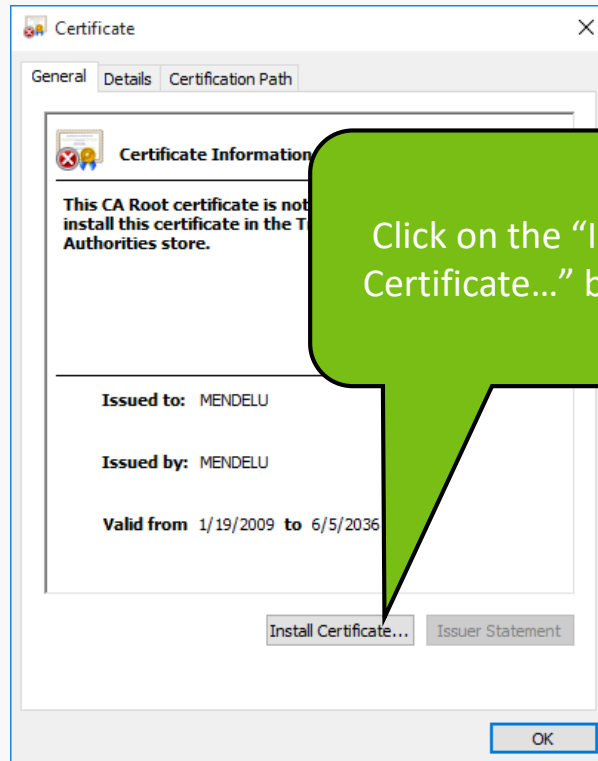

A certificate of 11. 11. 2015 exists at the moment which you can download from this application.

To install user certificate use the password **iNo6ove9**

- Download basic user certificate PKCS#12 (or PFX)(application: MS Windows->WiFi)
- Download user certificate DER PKCS#12 (application: Linux->WiFi)
- Download user certificate PEM PKCS#12 (application: Linux->WiFi)
- Download user certificate PEM PKCS#7 (application: iPaq->WiFi)
- Download root certificate PKCS#12 of certificate authority (application: MS Windows->certificate verification)
- Download root certificate PKCS#12 of certificate authority (application: Linux->certificate verification)
- Download installation pack for Windows Mobile 2003

First of all, you will need to download "root certificate for MS Windows"

←  Certificate Import Wizard

Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.

A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.
